Wow! What a great research day. A few of us went into the genealogy room upstairs to research and some of us stayed in the meeting room and did research on our personal computers. We had three new members join the society and went upstairs to do research. Before we started our research we did swear into Jason Bilello as Vice-President, since he was not able to make the March swear-in meeting. Welcome on board Jason.

WE WOULD LIKE ALL MEMBERS TO PLEASE UPDATE YOUR EMAIL ADDRESS. If you have not received an email from us in the last month, we need your email address. You can send an email to Wanda's email address listed above with your email address..

PLEASE NOTE: If you have not renewed your membership, you can still do so. You will find a membership form in a past newsletter or on the website.

What You Need to Know About Genealogy and Family Tree Building Tools

If you're one of the millions of people who've caught the genealogy bug and are itching to learn more about your family's ancestry, you'll want some resources to help you out in your genealogy research. After all, the ancestry journey to "find my ancestors" requires navigating the multigenerational web of births, marriages, migrations, and milestones that have made you uniquely you. Luckily, growing interest in genealogy and DNA testing has made it easy for amateur genealogists to uncover deep insights about where they came from and their ancestors. With genealogy and family tree building tools, you can sleuth out your long-ago origins and discover more about who you are and where you came from and find your ancestors, all from the comfort of your computer. Every family tree building tool is a little different. But hey—every family is a little different too. So, finding the right one means making sure its features meet your personal needs and ancestral origins. The number of tools available for building a family tree and learning about your ancestry is rapidly growing. That's good news. If you're interested in finding out more about your family's history and researching the best genealogy sites, you have many options to choose from. Some sites are: My Heritage, Ancestry, Find My Past, Genes Reunited, Legacy Trees, Just Answer, & One Great Family. <https://www.top10.com/>
